Cutting edge IDI

The research at IDI comes in many flavours, not only through the different research areas, but also through the variety of people doing the research. Research is done by Master students, Ph.D. students, and by our scientific staff. The CSGSC 2003 unites these great resources into one conference.

This is an excellent opportunity for *you* to get to know the how-tos of conferencing, and to get an audience for your ground-breaking ideas!

Papers

Technical, survey, review and experimental papers, among others, are invited in the following fields whether they are formerly published or not:

- Complex Computing Systems
- Data and Information Management
- Development and Use of IT-systems
- Intelligent Systems

If the paper does not fit into any of these categories, feel free to submit in the Open Category.

All papers will be reviewed by the Ph.D. students attending the *IT-emner*, and accepted papers will be published in the conference proceedings.

Papers are submitted in two categories; Master Student category or Ph.D. category.

How to submit

All papers must be submitted electronically. Authors should E-mail a PDF version of their papers to either csgsc-phdpapers@idi.ntnu.no, for Ph.D. students, or csgsc-otherpapers@idi.ntnu.no for other students. Word and T_EX styles can be downloaded from the conference home page. Papers should not be longer than 10 pages and must follow the style-formats given. The full name and address (room number) of the author must appear in the E-mail.

The papers are judged based on their quality through double-blind reviewing. The name of the author should not appear in the paper, as this information is withheld from the reviewers.

Submission due	21/03 2003
Notification of acceptance	14/04 2003
Camera-ready version due	25/04 2003

For More Information: Please contact one of the Program Committee. This Call for Papers, as well as other conference information, is available on the World Wide Web at <http://csgsc.idi.ntnu.no/2003/>.
